Peter Parker

Product Engineer · Flutter · AI-first development

peterparker.developer@gmail.com · wa.me/+541127667104 · t.me/poteryal_trusy · github.com/petrfalkovsky · peter.greentext.ai

Hi! I'm a product engineer with 6+ years of experience: I design interfaces and take them all the way to production code in Flutter, TypeScript and React. I currently work as a UX Expert at Mercado Pago, where I'm responsible for the design system, accessibility and performance. I ship mobile apps to the App Store and Google Play: from a 4M MAU game (Grand Mobile) to a $1.2M MRR product where I led the team (Walter Writes AI — mobile). I build AI products end to end, from backend and ML to payments and growth: my own SaaS with paying users and a custom standalone ML model, and a CRM for stone fabrication that lets a manager be up to 5x more productive.

How I use AI models:

- I pick the model for the task and know the strengths of each version
- I know the limits of the context window and how to manage it
- I connect models to knowledge bases and documents and work correctly with external sources
- I use semantic search and project indexing
- I know how to cut latency, cost and resource usage

Simple rules I follow:

- I dictate prompts by voice — that way the model gets more context
- I describe the result and acceptance criteria first, then the task itself
- I use a master agent that walks the task from stage to stage
- I ask for data to back up any result the model produces
- any repeated action becomes a skill that runs at the right stage
- several background agents are always working while I'm busy with other things
- I keep a shared meta-context, for example as a handoff, so new sessions start with what's already known

I've worked in teams from 2 to 50+ people, on offline mode and releases for B2B (TN-GROUP, Dolinger). When I lived in Saint Petersburg, I ran businesses: an on-site smartphone repair company, a sales department and franchise packaging, used-car selection and inspection, a coffee shop on Sennaya Square. I live in Buenos Aires, speak Spanish (Castellano, B1) and Russian, and understand Ukrainian, Belarusian, English, Portuguese and Italian by ear. I have a cat.

EXPERIENCE

AI roll-up of 20mm — ERP system

Fullstack Developer · Apr 2026 - Oct 2026

- From scratch to release: one manager handles 150–200 clients a month instead of 25–30; revenue grew from 3M to 8M RUB/month with no significant new costs. 20-mm.ru
- Quote in 15 minutes instead of 3–4 hours, stone selections from a photo in 10 minutes instead of 4–5 hours, contract and production documents in 20 minutes instead of 2–3 hours.

Greentext AI Inc. (Delaware C-corp)

Founder, Lead Flutter Developer · Mar 2025 - present

- **Greentext AI** — my own SaaS with paying users: Flutter (Web, iOS, Android) + Go + custom ML model (RoBERTa), Stripe. app.greentext.ai
- **Walter Writes AI** — AI humanizer for Walter IA Inc. (USA), $1.2M MRR: led development from scratch, hired a team of 3 developers. App Store · Google Play
- **Erlesen — Kurzgeschichten** — short-story reader for the German market: audio, offline library, subscriptions. erlesen.swiss · App Store · Google Play
- **AI Clean Up** — iOS photo cleaner: similar and blurry photos (perceptual hash, Apple Vision), native screens via Swift. App Store
- **JewBuzz Love** — dating, 10K+ MAU: real-time chats, map, roulette, blind dates. App Store · Google Play

Games

Flutter Developer · 2021 - 2025

- **Grand Mobile: Role Play Online** (4M MAU) — shipped the iOS version in 10 months, a Java → Flutter port: 30+ screens, logic for 40+ game modules, contracts with the C++ backend. grnd.game · App Store · Google Play
- **Rus Mobile: RP Online** (Kaif Games, Dubai) — built and wired 12 interfaces. Google Play
- **MATRESHKA RP** — 3 complex interfaces and an onboarding tutorial with on-screen widget highlighting. App Store · Google Play

ERP system for equipment field service (TN-GROUP LLC)

Flutter Developer · Feb 2023 - Jun 2024

- 4 client apps on ERP-Aurora, a WebView browser for signing in to group companies' accounts; offline-first for legacy Android devices, specs and releases.

Dolinger — food delivery mobile app

Flutter Developer · May 2022 - Jan 2023

- 70+ client apps: maps and payment SDKs, push and deep links, store publishing; introduced a Contribution Guide and Gitflow.

SKILLS

Flutter · Dart · Bloc · Riverpod · Clean Architecture · Swift · Kotlin · TypeScript · React · Next.js · Go · PostgreSQL · Redis · Firebase · Stripe · In-App Purchase · Docker · CI/CD · Playwright · Unit / Widget / Integration tests · Figma · Claude Code · MCP

Languages: Spanish (Castellano, B1), Russian; by ear — Ukrainian, Belarusian, English, Portuguese, Italian · **Education:** Belarusian State Technological University, Faculty of IT, Software Engineering
